## Question: 1

Why is it important to "Report Downtime" during the execution phase of a Work Order?

- A. To accurately calculate Asset Availability and Reliability metrics.
- B. To ensure the technician gets paid for their time.
- C. To trigger an automatic purchase of replacement parts.
- D. To move the Work Order to 'COMP' status.

**Answer: A**

## Question: 2

When a technician is performing a Lockout/Tagout (LOTO) procedure on a Work Order, what is the role of a "Precaution"?

- A. It is a list of tools needed for the repair.
- B. It is a specific action or state (e.g., Wear Safety Goggles) required to mitigate a Hazard.
- C. It is the name of the supervisor who approved the work.
- D. It is the estimated time to complete the safety check.

**Answer: B**

## Question: 3

In the Work Order Tracking application, which tab is used to view the specific "Assignments" made to individual laborers or crews?

- A. Plans
- B. Actuals
- C. Assignments
- D. Log

**Answer: C**

## Question: 4

Within the "Technician (RBA)," a user sees a blue "plus" (+) icon. What is the primary function of this button?

- A. To create a new Work Order or Service Request.
- B. To delete the current Work Order.
- C. To increase the font size of the application.
- D. To contact IBM support.

**Answer: A**

### Question: 5

Which action must be performed to make a Safety Plan available for selection on a Work Order?

- A. The Safety Plan must be in 'ACTIVE' status.
- B. The Safety Plan must be linked to the Asset or Location on the Work Order.
- C. The Safety Plan must be approved by the System Administrator.
- D. The Work Order must be in 'INPRG' status.

**Answer: B**

### Question: 6

An asset is equipped with an odometer. During a maintenance task, the technician notices the odometer reading is different from what is recorded in Maximo. Which action should the technician take to update this in the Work Order?

- A. Add a Work Log entry with the new number.
- B. Update the "Asset Description" field.
- C. Use the "Enter Meter Readings" action.
- D. Create a New Asset record.

**Answer: C**

### Question: 7

If a technician needs to perform work on multiple assets at the same location within a single Work Order, which feature should they use?

- A. The Work Order Hierarchy.
- B. The Specification tab.
- C. The Failure Reporting tab.

D. The Multi Asset, Location, and CI table.

**Answer: D**

### Question: 8

What happens if a user changes their "Default Insert Site" in their profile and then creates a new Work Order?

- A. The "Site" field on the new Work Order will automatically populate with the new default value.
- B. The Work Order will be created at the original site until the user restarts the server.
- C. The user will be prompted to enter a password to confirm the change.
- D. All existing Work Orders will be moved to the new site.

**Answer: A**

### Question: 9

While performing a repair, a technician discovers that the asset must be de-energized and locked. Which Maximo Manage application is used to record the specific sequence of tags and locks applied to the asset?

- A. Work Order Tracking (under the Work Log tab).
- B. Assets application (under the Spare Parts tab).
- C. Planning tab of the Work Order (under Lockout/Tagout sub-tab).
- D. Inventory application (under the Issues and Returns tab).

**Answer: C**

### Question: 10

Before starting work on a high-voltage electrical panel, a technician must perform a Lockout/Tagout (LOTO). Where does the technician find the pre-defined safety steps and the specific tags to be applied?

- A. In the "User Profile" settings.
- B. In the "Communications" tab.
- C. In the "Actuals" tab.
- D. In the "Safety Plan" sub-tab of the "Plans" tab.
