Question: 1

What is the expected outcome if the Behaviour Detection server configuration file contains an incorrect database connection string?

- A. The application installs but produces no alerts
- B. Installation halts with a connection error
- C. Installation succeeds but skips schema creation
- D. The error is ignored and logs display warnings only

Answer: B

Question: 2

Why is security attribute configuration critical in KYC setup?

- A. It sets up BI Publisher access for case officers
- B. It ensures scenarios are linked with Behaviour Detection
- C. It configures the EDQ match-scoring thresholds
- D. It defines which user roles can access sensitive customer data

Answer: D

Question: 3

Before installing Enterprise Case Management, which prerequisite must be ensured?

- A. KYC Excel Upload templates are populated
- B. BI Publisher dashboards are configured
- C. The ECM schema is created in the target database
- D. EDQ jobs are scheduled for screening

Answer: C

Question: 4

What is the purpose of executing reporting files during installation?

- A. To create schema objects and reporting templates
- B. To generate sanctions alerts
- C. To configure Process Monitoring Framework sequences
- D. To run KYC ingestion jobs

Answer: A

Question: 5

During installation, which type of file contains the XML configurations necessary for Behaviour Detection setup?

- A. Control-M job definition file
- B. Application configuration XML
- C. Scenario rule file
- D. Process Modeller sequence file

Answer: B

Question: 6

Which type of file is used to define sanction list configurations during installation?

- A. CSV mapping file
- B. Excel (.xls) template
- C. JSON payload file
- D. XML configuration file

Answer: D

Question: 7

In PMF, what is the purpose of defining human tasks within the Process Modeller?

- A. To create compliance regulatory reporting jobs
- B. To generate alerts in Behaviour Detection
- C. To assign workflow responsibilities and actions to users
- D. To configure EDQ screening thresholds

Answer: C

Question: 8

Which file format is required for KYC bulk uploads?

- A. Comma-separated values (.csv)
- B. Excel (.xls/.xlsx)
- C. XML configuration file
- D. JSON payload

Answer: B

Question: 9

You are executing the Behaviour Detection files on a Linux server. Which user privilege is most critical for avoiding runtime failures?

- A. Root-level access to all directories
- B. Write access to the FCCM schema tables
- C. Execute privileges on installation scripts and write access to target schema
- D. Superuser access to Oracle Grid Infrastructure

Answer: C

Question: 10

A team has completed installation but finds Behaviour Detection services not starting automatically. Which configuration step was most likely missed?

- A. Adding the service to the operating system's startup scripts
- B. Linking scenarios in the Scenario Manager
- C. Uploading the XML files into Process Modeller
- D. Executing the schema-creator utility

Answer: A
