# Latest Version: 6.0

## Question: 1

You are using RSVP in your network to signal MPLS LSPs. You are asked to ensure that the egress MPLS router receives the full label stack, containing both the hop-by-hop and VPN label. Which configuration will satisfy this requirement?

- A. Apply set protocols rsvp interface no-aggregate to the egress interface.
- B. Use the set protocols rsvp keep-multiplier command.
- C. Use the set protocols mpls expand-loose-hop command.
- D. Use the set protocols mpls explicit-null command.

**Answer: D**

## Question: 2

By default, which router in an MPLS LSP removes the PLS header?

- A. ingress router
- B. egress router
- C. ultimate router
- D. penultimate router

**Answer: D**

## Question: 3

An established RSVP-signaled LSP suffers a link failure. What is one action taken by the local RSVP-enabled router?

- A. A ResvErr message is sent upstream.
- B. A ResvTear message is sent upstream.
- C. A ResvErr message is sent downstream.
- D. A ResvTear message is sent downstream.

**Answer: B**

## Question: 4

You want to ensure that access switches on your network cannot transition to a root bridge state, while maintaining your carefully designed and implemented spanning-tree topology. Which feature would you deploy on interfaces connected to your access switches?

- A. loop protection
- B. BPDU protection
- C. root protection
- D. storm control

**Answer: A**

### Question: 5

Which two statements are correct about default BGP route propagation?  
(Choose two.)

- A. UEBGP speakers advertise IBGP-learned routes to other EBGP peers.
- B. EBGP speakers advertise IBGP-learned routes to other EBGP peers by using a policy.
- C. IBGP speakers advertise EBGP-learned routes to other IBGP peers.
- D. IBGP speakers advertise IBGP-learned routes to other IBGP peers.

**Answer: A,C**

### Question: 6

You are building a new network using the IS-IS protocol. The network design calls for a 1GbE interface to have a cost of 100, and a 10GbE interface to have a cost of 10. Which statement is correct?

- A. Jumbo frames must be enabled on all interfaces.
- B. Wide metrics must be enabled on all IS-IS routers.
- C. The links between two 10GbE interfaces must have Level 1 disabled.
- D. All routers in the network must be configured for Level 2 only.

**Answer: B**

### Question: 7

By default, which three fields are used in the ECMP load-balancing algorithm for Layer 3 IPv4 traffic?  
(Choose three.)

- A. protocol

- B. destination address
- C. incoming interface index
- D. outgoing interface index
- E. source port

**Answer: A,B,C**

### Question: 8

Interface ge-0/0/0.0 connects your network to your ISP. You want to advertise this interface address as an Internal route In OSPF without creating a neighbor with your ISP. In this scenario, how is this task accomplished?

- A. Add ge-0/0/0.0 as a passive interface In OSPF.
- B. Configure a static route for Interface ge-0/0/0.0.
- C. Create a generated route for Interface ge-0/0/0.0.
- D. Remove interface ge-0/0/0.0 from OSPF.

**Answer: A**

### Question: 9

When considering BGP route propagation, which two statements are correct?  
(Choose two.)

- A. EBGp speakers send routes learned from IBGP neighbors to IBGP neighbors.
- B. IBGP speakers send routes learned from IBGP neighbors to IBGP neighbors.
- C. EBGp speakers send routes learned from EBGp neighbors to IBGP neighbors.
- D. IBGP speakers send routes learned from EBGp neighbors to IBGP neighbors.

**Answer: A,D**

### Question: 10

BGP update messages contain which two elements?  
(Choose two.)

- A. path advertisements
- B. path attributes
- C. path assignments
- D. path announcement

**Answer: A,B**
