## Question: 1

Your company has just started using Search Ads 360. You need to limit access to Additional Google services for your entire organization by using the Admin console. Only the marketing team and a specific group of users from the web design team should have access. What should you do?

- A. Enable Search Ads 360 for the marketing organizational unit (OU). Create a new group in the Admin console that includes the web design team users who need access. Enable Search Ads 360 for that group.
- B. Enable Search Ads 360 for both the marketing and web design team organizational units (OUs). Create a group to explicitly deny access to Search Ads 360. Assign the group to the web design users who should not have access.
- C. Enable Search Ads 360 for the marketing organizational unit (OU). Create a sub-OU under the marketing OU. and move the web design team users who need access into this sub-OU.
- D. Enable Search Ads 360 at the top level of your organizational structure.

**Answer: A**

## Question: 2

You notice an increase in support cases related to Chrome browser within your organization. You suspect a potential outage or service disruption with Chrome browser. You need to determine whether any information has been released about the issue and if there are any projected timelines for its resolution. What should you do first?

- A. Review the Google Workspace Status Dashboard
- B. Log a case with Chrome Enterprise support.
- C. Collect a HAR file, and use the Google Admin Toolbox to identify potential failures.
- D. Use the Help Assistant within the Google Admin console to identify if there was a recent outage.

**Answer: A**

## Question: 3

Your organization uses live-streaming to host large Google Meet meetings. You need to limit the participation to affiliated Google Workspace domains by using the Admin console. What should you do?

- A. Add participants to an organizational unit (OU). Turn on live streaming.
- B. Add the Trusted Workspace domain names in the Stream dialog box.

- C. Turn on in-house live streaming. Invite users from affiliated domains.
- D. Turn off live streaming to Youtube.

**Answer: A**

### Question: 4

Your organization has enabled Google Groups for Business to let employees create and manage their own email distribution lists and web forums. You need to ensure that users cannot join external Google Groups with their Google Workspace accounts without interrupting internal group usage. What should you do?

- A. Use the Directory API to change the settings of user-created groups to disable features that allow external users to access, view, or post on groups.
- B. Set the setting for Google Groups for Business called Accessing groups from outside this organization to Private.
- C. In Additional Google Services, turn Google Groups OFF at the root organizational unit.
- D. Set the setting for Google Groups for Business called Default for permission to view conversations to All organization users.

**Answer: B**

### Question: 5

Your organization needs an approval application for purchases where a user can enter information on the purchase required and then submit it for management approval. You need to suggest a solution to create the application that must be available on both the web and mobile devices. Your organization does not have software developers or the budget to hire a third party. What should you do?

- A. Suggest the organization use AppSheet to create the application.
- B. Suggest that the organization continue to approve requests manually until budget is available to use a third-party application provider.
- C. Suggest that the organization use AppScript to create forms linked to a Google Sheet to store the purchase data.
- D. Suggest that the organization develop an application internally with a database, a backend service for data retrieval, and a frontend service for the application's user interface.

**Answer: A**

### Question: 6

The innovation team at your organization has a dedicated room with prototype equipment. You need to make the room bookable, add the equipment, and ensure that there are no booking conflicts. Only the innovation team and the sales directors can access this room. What should you do?

- A. Edit the Google Calendar settings for the room resource. Adjust the permission settings so only the innovation team and sales director group can view and book time on this calendar.
- B. Create a Google Group for the innovation team and another Google Group for sales directors. Share the room's calendar with both groups.
- C. Create a Google Calendar event for the room. Share the event with the innovation team and sales directors.
- D. Create a separate Google Calendar resource for the room. Manually manage booking requests from both teams.

**Answer: A**

### Question: 7

Your company is streamlining workflows by creating custom applications for tasks like filing expense reports or requesting time off. You need to identify a Google Workspace solution to develop these applications. Your development team has only basic coding knowledge. What should you do?

- A. Enable Gemini for Workspace. Direct users to use generative AI across Gmail and Drive to simplify the submission of expense reports.
- B. Direct employees to use Google Forms to collect data and create basic workflows.
- C. Enable AppScript for your organization and allow employees to build add-ons to existing Workspace solutions.
- D. Enable AppSheet for your organization.

**Answer: D**

### Question: 8

You are configuring Gmail for your company and want to implement a layered security approach. You decide to implement industry- standard email authentication protocols. What should you do? Choose 2 answers

- A. Configure a blocked senders rule to block all emails from unknown senders.
- B. Configure DKIM to digitally sign outbound emails and verify their origin.
- C. Disable IMAP for your organization to prevent external clients from accessing Gmail.
- D. Set up SPF records to specify authorized mail servers for your domain.
- E. Enable a default email quarantine for all users to isolate suspicious emails and determine if the messages haven't been authenticate

**Answer: B, D**
