Question: 1

If an architect is primarily optimizing throughput, latency, and response behavior, which design domain is most relevant?

- A. Cloud-based Performance Design
- B. Cloud-based Cost Design
- C. Cloud Migration
- D. Industry Best Practices of Huawei Cloud

Answer: A

Question: 2

Which industry is explicitly covered in Huawei Cloud best practices as a cloud transformation case area?

- A. Retail point-of-sale terminals
- B. Telecommunications core transport
- C. Semiconductor fabrication
- D. Insurance

Answer: D

Question: 3

The topic in this domain that most directly addresses distributed cloud capability outside centralized regions is _____.

- A. Edge Technology
- B. BMS
- C. OBS
- D. Cost Design

Answer: A

Question: 4

When an architect plans to modernize applications into packaged runtime units during migration, which topic is most directly relevant?

- A. Cloud Migration Success Stories
- B. Database Migration
- C. Containerization
- D. Cloud-based Cost Design

Answer: C

Question: 5

A solution must continue serving users as demand increases unpredictably. Which design domain is most directly responsible for that requirement?

- A. Cloud-based Scalability Design
- B. Cloud-based Cost Design
- C. Cloud-based Availability Design
- D. Cloud Service Enablement

Answer: A

Question: 6

Which design domain is most directly concerned with ensuring that system resources can be increased without major architectural rework?

- A. Cloud-based Availability Design
- B. Cloud-based Scalability Design
- C. Cloud-based Performance Design
- D. Cloud O&M and Optimization

Answer: B

Question: 7

The design domain most directly associated with handling growth in workload and user demand is _____.

- A. Cloud-based Scalability Design
- B. Cloud-based Performance Design
- C. Cloud-based Cost Design

D. Cloud Migration

Answer: A

Question: 8

Which topic in this domain provides the broadest cross-industry reference point before moving into vertical use cases?

- A. Best Practices of Huawei Cloud for Insurance Industry
- B. Huawei Cloud Gaming Operations Data Analysis Solution
- C. Huawei Cloud Gaming Deployment Solution
- D. Best Practices of Huawei Cloud for Enterprises

Answer: D

Question: 9

An architect is comparing multi-AZ deployment patterns to improve resilience. Which design domain is this most closely aligned with?

- A. Cloud-based Cost Design
- B. Cloud-based Availability Design
- C. Cloud-based Performance Design
- D. Huawei Cloud AI Enablement

Answer: B

Question: 10

Which underlying cloud technology is most directly associated with Huawei's cloud infrastructure architecture foundation rather than a specific storage or edge service?

- A. OBS
- B. BMS
- C. QingTian Architecture
- D. Edge Technology

Answer: C
