## Question: 1

Which command can be used to report the history of the most recent full-system backup performed with ontape?

- A. ontape -s -v
- B. oncheck -pr
- C. systat pages
- D. onstat -L -0

**Answer: B**

## Question: 2

Which utility can be used to export data from a single table for use by another application?

- A. dbload
- B. dbexport
- C. onunload
- D. dbaccess

**Answer: D**

## Question: 3

Which file informs Informix tools where to find the keystore for encrypted connections?

- A. \$INFORMIXDIR/etc/onconfig
- B. \$INFORMIXDIR/etc/sqlhosts
- C. \$INFORMIXDIR/etc/conssl.cfg
- D. \$INFORMIXDIR/ssl/client.p12

**Answer: C**

## Question: 4

Which statement is a best practice when generating table statistics for the optimizer to use?

- A. It is recommended to run UPDATE STATISTICS LOW for each table, HIGH only for specific columns, and MEDIUM for the remaining columns in each table.
- B. It is recommended to run UPDATE STATISTICS HIGH for the whole database.
- C. It is recommended to run UPDATE STATISTICS LOW for each table and MEDIUM only for specific columns.
- D. It is only necessary to run UPDATE STATISTICS LOW for each table.

**Answer: A**

### Question: 5

The database server runs the following threads:

```
$ onstat -g ath|egrep 'lst|poll'
```

```
8 45fe1028 0 1 running 9soc* soctcpoll
```

```
9 45fe19b0 0 1 running 1cpu* ipcstrpoll
```

```
10 4601a028 0 2 sleeping forever 1cpu* soctcplst
```

```
11 46047a90 0 2 sleeping forever 1cpu* ipcstrl
```

What is the correct setting of NETTYPE configuration parameters for this server?

- A. NETTYPE ipcstr,1,150,NET, NETTYPE soctcp,1,150,CPU
- B. NETTYPE ipcstr,1,150,CPU, NETTYPE soctcp,1,150,CPU
- C. NETTYPE ipcstr,1,150,CPU, NETTYPE soctcp,1,150,SOC
- D. NETTYPE ipcstr,1,150,CPU, NETTYPE soctcp,1,150,NET

**Answer: D**

### Question: 6

Which statement is true about using external smartblob spaces ?

- A. Smart large objects can be stored externally in user-specified directories.
- B. Smartblobs in external smartblob spaces cannot be backed up externally.
- C. Smartblob directories are created with owner root and permission 700.
- D. A traditional smartblob space is not required.

**Answer: A**

### Question: 7

Which SQL administration API storage optimization operation returns unused extent pages to the chunk free list?

- A. repack
- B. shrink
- C. reshrink
- D. compress

**Answer: B**

### Question: 8

The Informix Connection Manager Server has the following sqlhosts:

```
server_grp10 group - - e=server_3
# HDR Primary
server_1 onsoctcp my_host_1 9088 g=server_grp10
# HDR Secondary
server_2 onsoctcp my_host_2 9088 g=server_grp10
# HDR RSS
server_3 onsoctcp my_host_2 9088 g=server_grp10
```

If the connection manager SLA has:

```
CLUSTER my_cluster
{
INFORMIXSERVER server_grp10
SLA sla_1 DBSERVERS=(server_1,server_3) \
POLICY=WORKLOAD
SLA sla_2 DBSERVERS=(server_1,server_2,server_3) \
POLICY=ROUNDROBIN
SLA sla_3 DBSERVERS=ANY
FOC ORDER=ENABLED PRIORITY=1
}
```

If a client connects to sla\_1, where will it connect?

- A. server\_1
- B. Any server in the server\_grp10 list
- C. Whichever of server\_1 and server\_3 is next up in the queue
- D. Whichever of server\_1 and server\_3 has the current lowest usage

**Answer: D**

### Question: 9

Which statement about smart triggers is true?

- A. They cannot be used with sharded queries
- B. They are used to synchronize GRID queries

- C. They execute asynchronously relative to the triggering event
- D. They use AI to determine the final data updates

**Answer: C**

### Question: 10

A heavily used table is experiencing performance degradation due to frequent extent allocations and disk fragmentation.

Which two options will provide a long-term solution?

(Choose two)

- A. Add new chunk to dbspace
- B. Increase the logical log size
- C. Reorganize extents using admin task
- D. Restart the Informix server to reorganize storage
- E. Redefine the table with larger EXTENT SIZE and NEXT SIZE values

**Answer: C,E**
