Latest Version: 6.0

Question: 1

An administrator wants to apply the same radio, channel, and SSID settings to multiple FortiAP devices at once. Which method is the most appropriate?

- A. Use a custom access point profile
- B. Create one SSID per FortiAP manually
- C. Configure each radio through CLI only
- D. Use FortiPresence location groups

Answer: A

Question: 2

Which wireless concept is most directly related to reducing co-channel interference in a dense deployment?

- A. Increasing log retention
- B. Careful channel planning
- C. Disabling NAC enforcement
- D. Using FortiPresence heat maps only

Answer: B

Question: 3

A branch office needs a repeatable way to deploy FortiAP devices with minimal configuration drift. Which operational benefit does profile-based management provide?

- A. Consistent configuration across multiple access points
- B. Automatic IPS signature updates on clients
- C. Dedicated routing tables per radio
- D. Isolation of FortiAnalyzer event handlers

Answer: A

Question: 4

When developing the high-level scope phase in wireless design projects, which statement best describes the scope?

- A. It covers the main topics to analysis existing wireless networks, and issues reports about general performance.
- B. It simplifies wireless design projects only for high-end devices that might require wireless connectivity.
- C. It uses the why, when, what and how questions to determine the goal of the project at a high level.
- D. It determines the top-tier groups that will be responsible for designing the wireless network.

Answer: C

Question: 5

Which capability most directly helps an administrator configure many FortiAP devices without repeating the same radio and SSID settings manually?

- A. VPN phase 1 templates
- B. Wireless client quarantine
- C. Syslog export templates
- D. Reusable custom access point profiles

Answer: D

Question: 6

A company wants employees to authenticate to the WLAN with stronger protection than an open or shared-passphrase design, while still allowing centralized policy enforcement. Which option best supports that requirement?

- A. Local AP login
- B. Open guest access
- C. Secure wireless access
- D. Static RF tuning

Answer: C

Question: 7

What type of server roles does the FortiPresence VM require to operate on-premises?
(Choose two.)

- A. Infrastructure server
- B. Terminal server
- C. Application server
- D. Authentication server

Answer: A,C

Question: 8

An administrator is reviewing a design that uses one SSID but different access outcomes after authentication. What is the strongest reason to use that model?

- A. It changes AP power
- B. It boosts RF gain
- C. It replaces logs
- D. It scales policy well

Answer: D

Question: 9

Which outcome is most likely when a WLAN uses one flat segment for all users and device types?

- A. Better reports
- B. Broader exposure
- C. Less roaming
- D. More channels

Answer: B

Question: 10

Channel utilization is a primary indicator of the bandwidth used and remaining in a wireless channel. Which other factors or issues can cause high channel utilization?
(Choose three.)

- A. Wireless clients using applications that require high bandwidth.
- B. Large numbers of wireless clients connected to your own APs.
- C. Large numbers of wireless clients connected to a neighboring AP on the same channel.
- D. Large numbers of wireless clients connected to a neighboring AP on a different channel.
- E. Neighbouring sources of wireless interference, such as a microwave.

Answer: A,B,C
