Question: 1

A company plans to deploy centralized wired network management using Aruba Central. Which operational benefits should the architect emphasize? (Select TWO.)

- A. Unified operational visibility
- B. Centralized configuration management
- C. Independent local administration
- D. Manual spreadsheet auditing

Answer: A,B

Question: 2

A network administrator notices inconsistent wireless policy enforcement across several branch offices managed with AOS-10. Which operational area should the administrator investigate FIRST?

- A. Printer maintenance tracking
- B. Office cafeteria schedules
- C. Group and policy assignments
- D. Employee onboarding workflows

Answer: C

Question: 3

An administrator discovers that several switches are no longer reporting telemetry information to Aruba Central monitoring dashboards. Which operational area should be investigated FIRST?

- A. Employee travel requests
- B. Office cafeteria schedules
- C. Printer lifecycle reports
- D. Device cloud connectivity status

Answer: D

Question: 4

Match the operational objective with the MOST appropriate Aruba Central capability.

Objective

1. Detect VLAN inconsistencies
2. Simplify switch deployment
3. Improve operational visibility

Capability

- A. Group-based templates
- B. VLAN analytics
- C. Monitoring dashboards
- A. 1-B, 2-A, 3-C
- B. 1-C, 2-B, 3-A
- C. 1-A, 2-C, 3-B
- D. 1-B, 2-C, 3-A

Answer: A

Question: 5

Wireless users report intermittent disconnections while moving between floors in a corporate office building managed with AOS-10. Which wireless capability should the administrator investigate FIRST?

- A. Office seating assignments
- B. Printer inventory management
- C. Roaming and mobility behavior
- D. Switch fan-speed monitoring

Answer: C

Question: 6

A branch office reports intermittent connectivity affecting wired IP phones connected to access-layer switches managed through Aruba Central. Which operational area should the administrator investigate FIRST?

- A. Switch interface health analytics
- B. Office cafeteria schedules
- C. Printer maintenance records
- D. Employee travel approvals

Answer: A

Question: 7

A company wants to standardize switch onboarding and wired policy deployment across distributed branch offices while reducing operational overhead. Which Aruba Central capabilities should the administrators implement?

(Select TWO.)

- A. Centralized template-based provisioning
- B. Manual CLI-only deployment
- C. Group-based deployment management
- D. Manual CLI-only deployment

Answer: A,C

Question: 8

A wireless administrator wants to improve operational consistency for SSID and authentication policy deployment across multiple branch environments. Which AOS-10 capabilities should be implemented?

(Select TWO.)

- A. Manual local configuration
- B. Group-based configuration deployment
- C. Independent AP administration
- D. Centralized policy management

Answer: B,D

Question: 9

An operations team wants to standardize configuration deployment across multiple branch environments managed through Aruba Central. Which capabilities should the administrators implement?

(Select TWO.)

- A. Group-based policy management
- B. Manual device-by-device provisioning
- C. Independent local switch configuration
- D. Centralized template deployment

Answer: A,D

Question: 10

Users report poor wireless performance and increased latency during meetings held in high-density conference areas. Which operational area should the administrator investigate FIRST?

- A. Office cafeteria schedules
- B. RF utilization and channel capacity
- C. Printer inventory records
- D. Switch fan-speed monitoring

Answer: B
