Question: 1

Which PowerProtect Data Manager features provide compliance automation and point-in-time recovery?

Feature

Snapshot Orchestration

Automated Policy Management

Deduplication

Role-Based Access Control

Function

- A) Provides point-in-time recovery for applications
- B) Simplifies compliance with backup and recovery standards
- C) Reduces data storage requirements
- D) Restricts access based on user roles

Response:

- A. Snapshot Orchestration - A, Automated Policy Management - B, Deduplication – C, Role-Based Access Control - D
- B. Snapshot Orchestration – A, Automated Policy Management – D, Deduplication – C, Role-Based Access Control - B
- C. Snapshot Orchestration – C, Automated Policy Management – B, Deduplication – A, Role-Based Access Control - D
- D. Snapshot Orchestration – D, Automated Policy Management – B, Deduplication – C, Role-Based Access Control - A

Answer: A

Question: 2

When designing a Dell EMC PowerProtect DD solution, which best practice ensures optimal performance for high-throughput environments?

Response:

- A. Enable DD Boost integration with applications
- B. Configure RAID-5 storage for backups
- C. Use dedicated network paths for backup traffic
- D. Minimize the deduplication ratio

Answer: A,C

Question: 3

Which Dell EMC product is designed to provide cyber resiliency by isolating data and monitoring for anomalies?

Response:

- A. Dell EMC PowerProtect Data Manager
- B. Dell EMC Cyber Recovery
- C. Dell EMC Avamar
- D. Dell EMC NetWorker

Answer: B

Question: 4

Which tool is used to back up an Oracle database to PowerProtect DD using Dell EMC Application Direct?

Response:

- A. SSMS
- B. Oracle RMAN
- C. DDBEA
- D. SAP HANA Studio

Answer: B

Question: 5

Which requirement allows the Dell EMC RecoverPoint for VMs vRPAs to communicate with the ESXi servers hosting the Production or Copy VMs?

Response:

- A. Data interfaces of the vRPAs to the management address of the vCenter Server using TCP port 8800
- B. Data interfaces of the vRPAs to the VMkernel ports of the ESXi servers using IP
- C. Data interfaces of the vRPAs to the management address of the vCenter Server using TCP port 5760
- D. WAN interfaces of the vRPAs to the VMkernel ports of the ESXi servers using IP

Answer: B

Question: 6

The _____ component in Dell EMC Cyber Recovery Solution is responsible for securely moving data into the isolated recovery vault.

Response:

- A. Replication
- B. Deduplication
- C. Data Compression
- D. Cloud Tiering

Answer: A

Question: 7

A company wants to detect potential cyber threats as part of its data recovery strategy. Which feature of Dell EMC Cyber Recovery Solution fulfills this requirement?

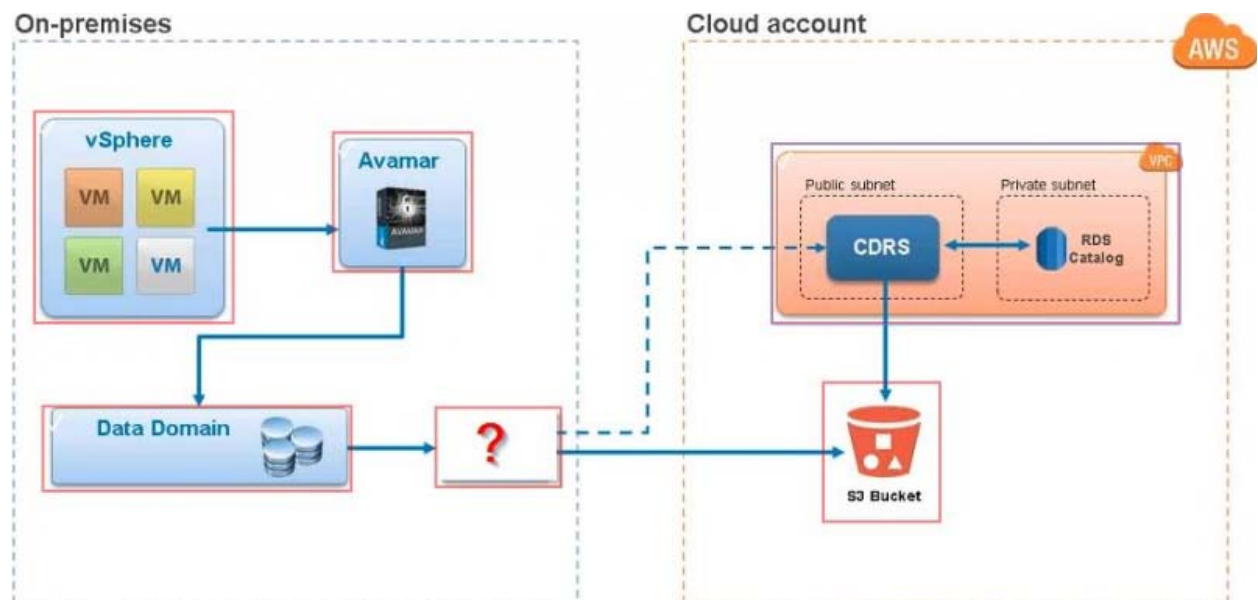

Response:

- A. Automated data encryption
- B. Cybersense analytics
- C. Cloud data management
- D. Deduplication on storage

Answer: B

Question: 8

Based on the graphic, which component in the Dell EMC Data Domain Cloud DR solution connects the On-Premises backup solution to the public cloud?

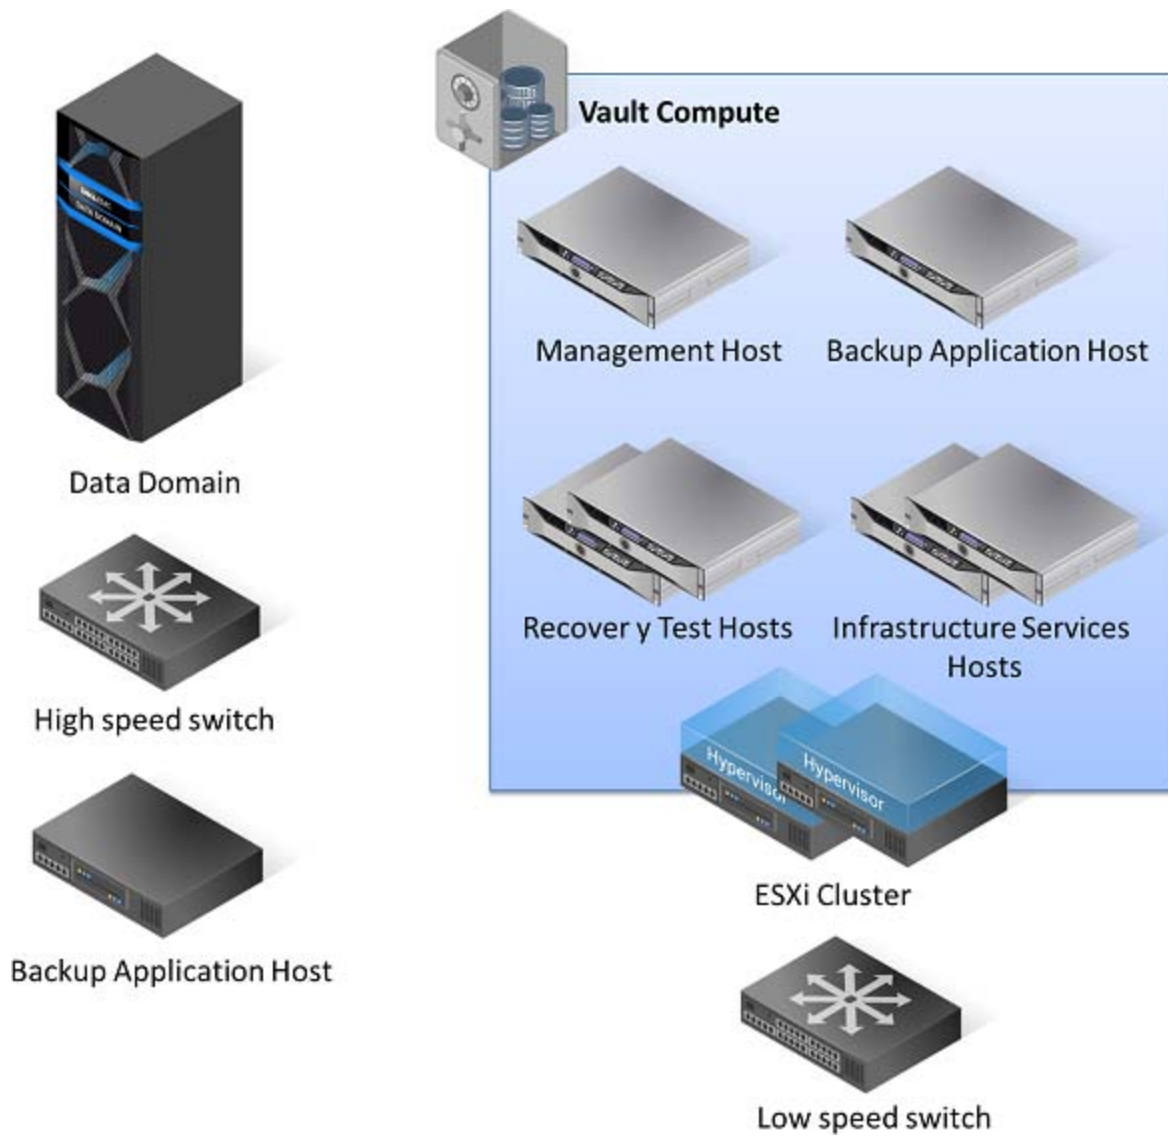

Response:

- A. Cloud DR Add-on
- B. Cloud Backup Manager
- C. Data Domain Cloud Connect
- D. Data Protection Cloud Appliance

Answer: A

Question: 9

As shown in the graphic, you have designed a Dell EMC Isolated Recovery Solution for a customer.

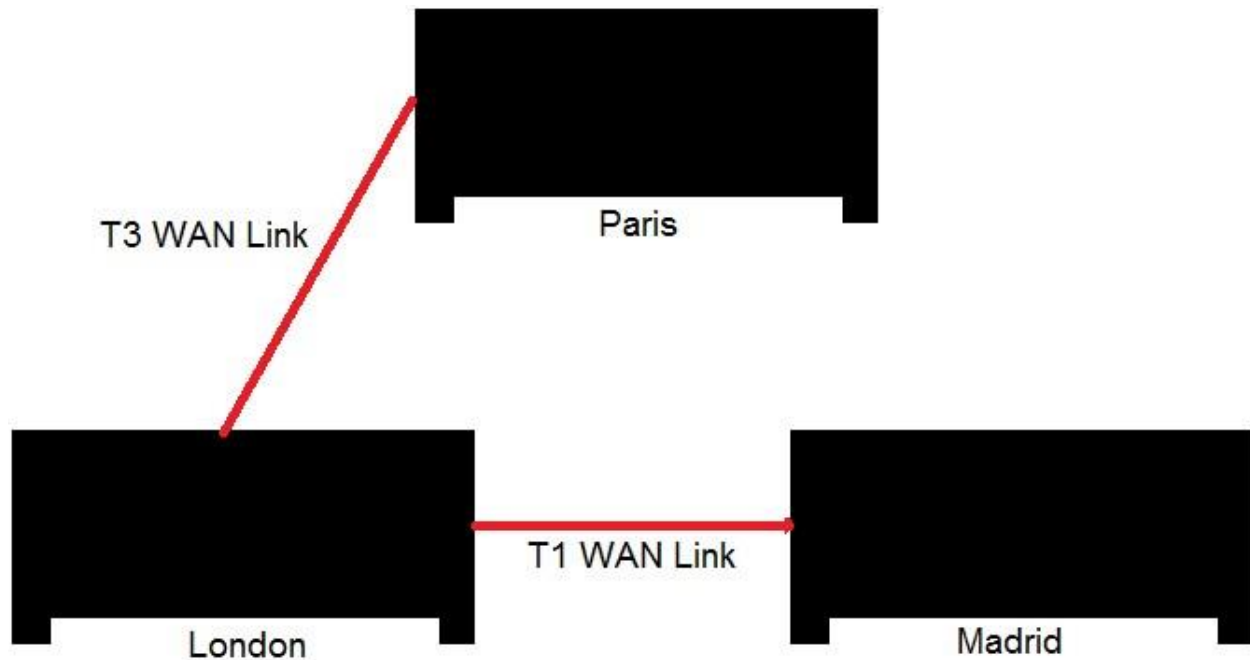

Which component includes an Avamar?
Response:

- A. Backup Application Host
- B. Data Domain
- C. Management Host
- D. Infrastructure Services Host

Answer: A

Question: 10

Refer to the Exhibit.

A company wants to implement replication using Dell EMC Data Domain systems in multiple locations. They want to replicate data at their London site to and from the Madrid site. In addition, the company wants to replicate data at the London site to and from the Paris site.

How should the company's design requirements be addressed?

Response:

- A. Due to WAN speed limitations, replication between Madrid and London is not supported
- B. Establish Bi-directional MTree replication between the sites
- C. Establish Collection replication between the sites
- D. Establish Bi-directional Collection replication between the sites

Answer: B
