Latest Version: 6.0

Question: 1

What is the primary role of memory in a multi-turn chat conversation using a Gen AI model in Snowflake Cortex Analyst?

- A. To maintain context throughout multiple requests
- B. To increase the speed of response generation
- C. To securely store user credentials
- D. To limit the number of tokens processed for each request

Answer: A

Question: 2

Which parameter can be used by administrators to restrict access to specific LLMs within Snowflake?

- A. NETWORK_POLICY
- B. SAML_IDENTITY_PROVIDER
- C. CORTEX_MODELS_ALLOWLIST
- D. CORTEX_ENABLED_CROSS_REGION

Answer: C

Question: 3

A Gen AI Specialist is using Document AI to create a model. When creating a model build with a name unique to the specified schema, this error is returned:

Unable to create a build on the specified database and schema. Please check the documentation to learn more.

What would cause this error?

- A. There is a model build with the same name in another schema in the database.
- B. The CREATE SNOWFLAKE.ML.DOCUMENT_INTELLIGENCE privilege has not been granted to the role the Specialist is using.
- C. The USAGE privilege on the database used to create the model build has not been granted to the role the Specialist is using.
- D. The SNOWFLAKE.DOCUMENT_INTELLIGENCE_CREATOR database role has not been granted to the role the Specialist is using.

Answer: B

Question: 4

Which Snowflake Cortex LLM function should be used to generate an instructional lesson plan based on a prompt?

- A. COMPLETE
- B. EXTRACT_ANSWER
- C. SUMMARIZE
- D. TRANSLATE

Answer: A

Question: 5

Which Cortex principle ensures organizations can safely experiment with AI without exposing users to harmful responses?

- A. Prompt Tuning
- B. Snowpark APIs
- C. Guardrails and Filters
- D. Zero-Copy Cloning

Answer: C

Question: 6

Which Snowflake feature allows developers to integrate generative AI workloads directly with data stored in Snowflake without moving the data outside the platform?

- A. Snowflake Data Exchange
- B. Snowflake Cortex
- C. Snowflake Marketplace
- D. Snowflake Streams

Answer: B

Question: 7

A financial services company is hesitant to move data outside its Snowflake account for AI analysis. Which Snowflake feature resolves this concern?

- A. External Functions
- B. Streams
- C. Replication
- D. In-database AI processing with Cortex

Answer: D

Question: 8

Which single Cortex capability is the core of enterprise-grade summarization workflows?

- A. Summarize
- B. Document AI ingestion
- C. Guardrails
- D. External Functions

Answer: A

Question: 9

A Gen AI Specialist needs to analyze the daily costs incurred for AI services in Snowflake. Which query will retrieve the credit consumption from Snowflake's metadata objects for data usage?

- A. `SELECT * FROM SNOWFLAKE.ACCOUNT_USAGE.QUERY_HISTORY WHERE SERVICE_TYPE='AI_SERVICES';`
- B. `SELECT * FROM SNOWFLAKE.INFORMATION_SCHEMA.METERING_HISTORY WHERE SERVICE_TYPE='AI_SERVICES';`
- C. `SELECT * FROM SNOWFLAKE.ACCOUNT_USAGE.METERING_HISTORY WHERE SERVICE_TYPE='AI_SERVICES';`
- D. `SELECT * FROM SNOWFLAKE.ACCOUNT_USAGE.METERING_DAILY_HISTORY WHERE SERVICE_TYPE='AI_SERVICES';`

Answer: D

Question: 10

Which governance principle ensures that all Cortex computations occur inside Snowflake rather than external systems?

- A. Data Egress
- B. Data Stays in Snowflake
- C. Multi-cluster Warehouses
- D. Zero-Copy Cloning

Answer: B
