Question: 1

In Qlik Sense, which component is responsible for synchronizing user and group information with Active Directory?

- A. Qlik Sense Engine Service (QES)
- B. Qlik Sense Scheduler Service (QSS)
- C. Qlik Sense Repository Service (QRS)
- D. Qlik Sense Proxy Service (QPS)

Answer: C

Question: 2

A company decided to apply its images to applications in Qlik Sense after approval of all of them by Marketing. The area manager asked to create a specific folder for these images, since the default folder would need to a cleaning because it contains many old images.

The system administrator creates a new content library in the Qlik Management Console (QMC) and adds the images so they can be used. Developers report that they are unable to view the new library created, but can view the default library.

What does the system administrator need to do to ensure that developers have access to the new content library?

- A. Make sure there is a security rule allowing users to access the new library created
- B. Images should be stored in the default library
- C. Users are the ones who need to create their own libraries
- D. Users need to upload their own images to the app

Answer: A

Question: 3

A Qlik Sense deployment is planned for 200 users initially. Within a year, the number of users will grow to

2000, with over 100 apps. Most of these users will be within the organization's firewall. There are plans to eventually allow access to some apps to users outside the firewall.

Which two deployment models will ensure secure access to Qlik Sense apps by authorized users outside the firewall? (Choose two.)

- A. Deploy a reverse proxy in the DMZ and configure it to forward all Qlik Sense traffic to the Qlik Sense servers on the corporate network.
- B. Enable all external users to connect to the corporate network via a secure VPN to access Qlik Sense apps.
- C. Deploy Qlik Sense in the DMZ and open all required ports to internal and external users.
- D. Deploy Qlik Sense in the corporate network, open all required firewall ports, and allow external users to access apps directly.
- E. Configure Qlik Sense in "off-line mode" for external users and allow them to access apps locally.

Answer: BD

Question: 4

Which two of the following are prerequisites for installing Qlik Sense Enterprise? (Select two)

- A. Windows Server operating system
- B. Access to a PostgreSQL database
- C. A valid Microsoft 365 subscription
- D. Active Directory configured for user authentication

Answer: AB

Question: 5

A system administrator needs to restrict access to a single app in a stream to a single user. Other users in the stream should NOT be able to see this app, but should be able to see all other apps in the stream.

What should the system administrator do to meet this requirement?

- A. Use section access to limit the data other users can see
- B. Create a new stream for the app and only allow the single user access
- C. Create a custom property and security rule linked to the app and user
- D. Create a tag and security rule linked to the app and user

Answer: C

Question: 6

Referring to the image.

Edit reload task

IDENTIFICATION

Name

App

EXECUTION

Enabled

Task session timeout (minutes)

Max retries

Triggers Actions ▾

Name	Type	Enabled
No records found		

What is the result when the administrator starts the task *Black_Friday* in the tasks tab?

- A. The task will start, but then fail
- B. Will run successfully
- C. The task will run continuously
- D. A warning will appear for a trigger to be created

Answer: B

Question: 6

Refer to the exhibit.

A system administrator creates this security rule to keep User1 out of the finance stream: $((user.name \neq "User1"))$

After conducting an audit on the finance stream, the system administrator notices that the security rule does NOT function as expected.

What is causing this issue?

- A. The syntax of the security rule for User1 is NOT correct
- B. The resource filter which applies to User1 does NOT include App_* to deny access for every app in the stream
- C. Another security rule is allowing User1 Read and Publish permissions
- D. UDC synchronization has NOT been performed

Answer: B

Question: 7

When performing system maintenance on a Qlik Sense environment, which activities should be included to ensure optimal performance? (Select two)

- A. Defragment the hard drive hosting Qlik Sense data
- B. Back up the Qlik Sense Repository Database (QRS)
- C. Disable Windows updates
- D. Regularly clean up and archive logs

Answer: BD

Question: 8

What is the primary function of the Qlik Sense Log Monitor app?

- A. To track app usage and user activity
- B. To monitor and analyze system logs for troubleshooting
- C. To manage and monitor license allocations
- D. To monitor the performance of reload tasks

Answer: B

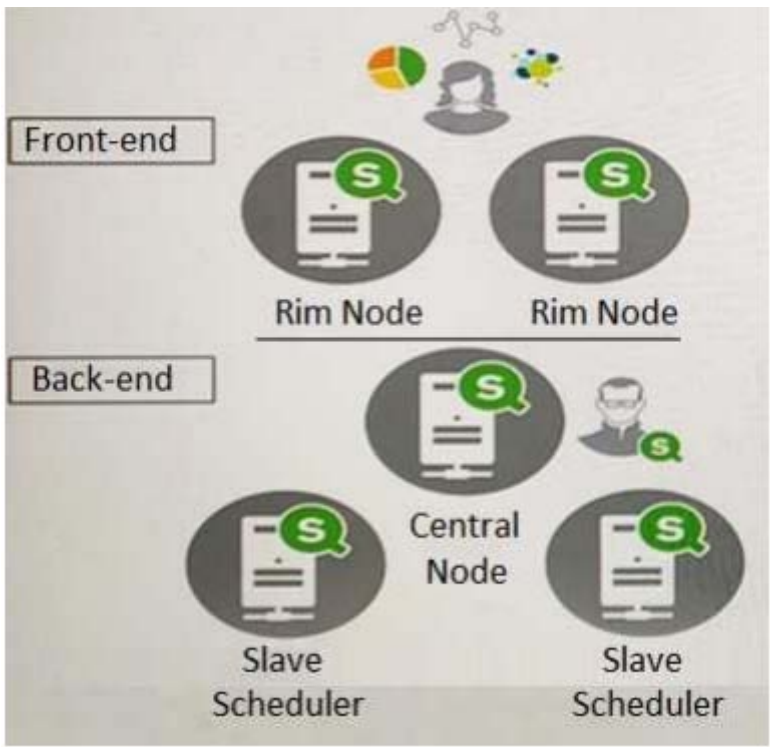

Question: 10

A system administrator must design a Qlik Sense server architecture that meets the following requirements:

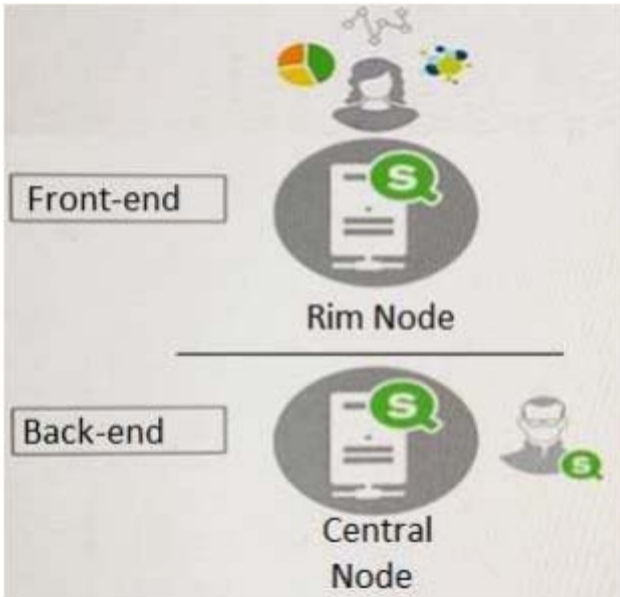

- Approximately 1000 users will be using apps
- Apps are reloaded outside of office hours
- The total size of data in all apps will be approximately 600 million rows
- Apps must be available 24/7

Which architecture meets these requirements in the most cost efficient way?

A)

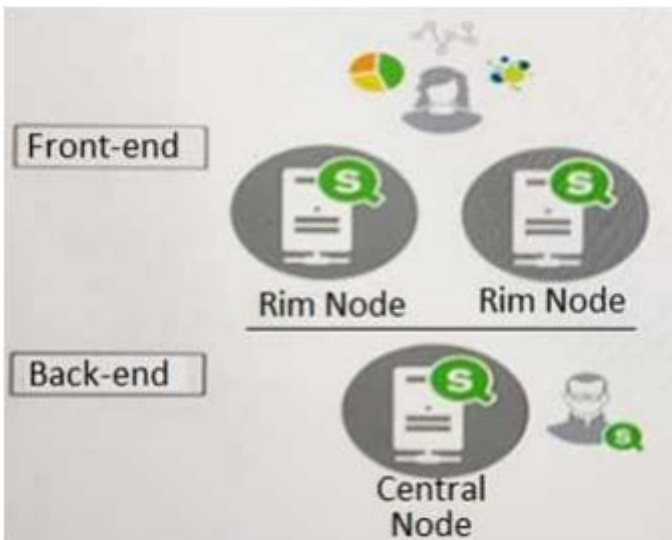

B)

C)

D)

A. Option A

B. Option B

C. Option C

D. Option D

Answer: D
