Question: 1

Under the 1990 Clean Air Act, the EPA sets limits on air pollutants. Under the act, individual states:

- A. may set limits that are weaker
- B. may set limits that are stronger
- C. may set limits that are weaker or stronger, depending on the situation
- D. may not set their own limits

Answer: B

Explanation:

Under the Clean Air Act of 1990, states may set limits on the amount of pollutants allowed in the air if they are as strong as or stronger than the EPA's standards, but they may not set standards that are weaker.

Question: 2

NESHAP set standards for air pollutants which:

- A. may cause increased fatalities
- B. may cause serious illnesses
- C. which are not covered by NAAQS
- D. all of the above

Answer: D

Explanation:

NESHAP stands for National Emissions Standards for Hazardous Air Pollutants, which are determined by the EPA. They apply to pollutants not covered by the National Ambient Air Quality Standards which may cause an increase in fatalities and/or serious illness.

Question: 3

_____ governs the sale and distribution of pesticides in the US.

- A. CZMA
- B. FQPA
- C. FIFRA
- D. RCRA

Answer: C

Explanation:

PIPRIA stands for Federal Insecticide, Fungicide, and Rodenticide Act. Its history goes all the way back to 1910, although it didn't acquire the Federal Insecticide, Fungicide, and Rodenticide Act name until 1947. It used to be enforced by the US Department of Agriculture, but in 1972 EPA took over the responsibility of enforcing FIFRA.

Question: 4

Under OSHA's Hazard Communication Standard there are _____ required pictograms for labels on hazardous materials.

- A. eight
- B. ten
- C. five
- D. six

Answer: A

Explanation:

Under the Hazard Communication Standard set by the Occupational Safety and Health Administration (OSHA), there are a total of eight required pictograms used to notify workers of hazardous materials: Health, Flame, Exclamation Point, Gas Cylinder, Corrosion, Exploding Bomb, Flame Over Circle, and Skull and Crossbones. The 9th pictogram is Environment, but is not required by OSHA, as environmental hazards are outside its purview.

Question: 5

Under the NAAQS there are _____ common air pollutants.

- A. six
- B. five
- C. ten
- D. seven

Answer: A

Explanation:

The EPA created the National Ambient Air Quality Standards (NAAQS) to govern six common pollutants: ozone, particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide, and lead.
