## Question: 1

Who is considered the father of Artificial Intelligence?  
Response:

- A. Alan Turing
- B. John McCarthy
- C. Isaac Newton
- D. Albert Einstein

**Answer: B**

## Question: 2

How does AI contribute to personalized marketing?  
Response:

- A. By ignoring customer preferences
- B. Through tailored product recommendations
- C. By promoting one-size-fits-all products
- D. Decreasing online shopping options

**Answer: B**

## Question: 3

In machine learning, what is 'regression' used for?  
Response:

- A. To classify data into different categories
- B. To predict a continuous outcome variable
- C. To reduce the dimensions of data
- D. To enhance the speed of data processing

**Answer: B**

## Question: 4

How could AI contribute to future personalized healthcare?

Response:

- A. By giving the same treatment to every patient
- B. Through tailored treatment plans based on individual data
- C. Reducing the need for doctors in treatment
- D. Focusing only on pharmaceutical advancements

**Answer: B**

### Question: 5

What is the primary difference between Artificial Intelligence (AI) and Human Intelligence (HI)?

Response:

- A. AI processes information faster than HI
- B. AI is capable of emotional reasoning
- C. HI can process abstract concepts, unlike AI
- D. HI relies on computational algorithms

**Answer: C**

### Question: 6

What challenge does AI pose in terms of data privacy?

Response:

- A. It guarantees absolute data privacy
- B. AI does not interact with data
- C. Risk of privacy breaches with increased data collection
- D. Slows down data processing, ensuring privacy

**Answer: C**

### Question: 7

Which historical AI project aimed to create an understanding of natural language in machines?

Response:

- A. Deep Blue
- B. ELIZA

- C. The Turing Test
- D. The General Problem Solver

**Answer: B**

### Question: 8

Which of these is a type of machine learning?  
Response:

- A. Supervised learning
- B. Algorithmic learning
- C. Binary learning
- D. Hardware learning

**Answer: A**

### Question: 9

Which algorithm is commonly used in machine learning for classification problems?  
Response:

- A. QuickSort
- B. Linear regression
- C. Decision trees
- D. Fourier transform

**Answer: C**

### Question: 10

In future healthcare, how is AI expected to assist doctors?  
Response:

- A. By replacing doctors in surgeries
- B. Providing diagnostic assistance and treatment recommendations
- C. Reducing the need for medical research
- D. Eliminating the role of human healthcare providers

**Answer: B**
