Latest Version: 6.0

Question: 1

You want a software that can automatically collect and aggregate log data generated throughout your organization's infrastructure, analyze it, and send alerts if it detects a deviation from the norm. Which software must you use?

Response:

- A. Security Integration Management (SIM)
- B. Security Information Management (SIM)
- C. Security Event Management (SEM)
- D. Security Information and Event Management (SIEM)

Answer: D

Question: 2

Which of the following is necessary step when creating a secret in vault?

Response:

- A. Vault-managed key is necessary to encrypt the secret
- B. Digest Hash should be created of the secret value
- C. Object Storage must be created to run secret service
- D. Shamir's secret sharing algorithm should be used to unseal the vault

Answer: A

Question: 3

How can you increase the expiration of a pre-authenticated request (PAR) associated with a bucket?

Response:

- A. Edit the PAR and define the desired expiration.
- B. You cannot edit a PAR. Delete the PAR and recreate with the desired expiration.
- C. Find the Identity and Access Management (IAM) policy associated with the PAR. Define the desired expiration in the policy.
- D. Edit the bucket metadata and change the expiration date.

Answer: B

Question: 4

Which components are a part of the OCI Identity and Access Management service?

Response:

- A. Policies
- B. VCN
- C. Compute instances
- D. Regional subnets

Answer: A

Question: 5

Which tasks can you perform on a dedicated virtual machine host?

Response:

- A. Instance configurations
- B. Manual scaling
- C. Creating instance pools
- D. Capacity reservations

Answer: B

Question: 6

In which two ways can you improve data durability in Oracle Cloud Infrastructure (OCI) Object Storage?

Response:

- A. Enable versioning
- B. Setup volumes in a RAID1 configuration
- C. Enable client-side encryption
- D. Limit delete permissions
- E. Enable server-side encryption

Answer: A,D

Question: 7

You are scheduled to run a system maintenance on OCI environment for two hours and would require pausing alarm notifications from Monitoring Service during this period.

Which of the following configuration is used to achieve this requirement?

Response:

- A. Resolution
- B. Suppression
- C. Suspension
- D. Dimension

Answer: B

Question: 8
