Question: 1

You are analyzing customer behavior patterns for a recent marketing campaign using Adobe's Customer Journey Analytics (CJA). During your analysis, you notice several spikes in website traffic and engagement metrics that correlate with specific promotional activities, such as email launches and social media ads.

To provide context and insights for your team, Which feature you can utilize in CJA to highlight these key events directly on the data visualizations?

Response:

- A. Annotations
- B. Export
- C. Intelligent Alerts
- D. Scheduled Projects

Answer: A

Question: 2

Which of the following statements is true regarding a schema enabled for profile in Adobe Customer Journey Analytics (CJA)?

Response:

- A. Once you save a schema enabled for profile, it can no longer be disabled for profile.
- B. Once a schema is enabled for profile, it can be disabled at any time.
- C. A schema enabled for profile can only be modified, but not disabled.
- D. A schema enabled for profile can be deleted entirely from the system.

Answer: A
