Question: 1

What is the primary distinction between endpoint security and network security?
Response:

A. Endpoint security protects the internet
B. Network security secures end-user devices
C. Endpoint security protects individual devices; network security protects traffic flow
D. Network security only applies to wireless networks

Answer: C

Question: 2

Which devices operate at Layers 3 and 4 of the OSI model?
(Choose two)
Response:

A. Router
B. Hub
C. Firewall
D. Repeater

Answer: A,C

Question: 3

What is the primary goal of a Data Loss Prevention (DLP) system?
Response:

A. Enhance packet forwarding
B. Prevent unauthorized data transfers
C. Assign IP addresses
D. Track bandwidth usage

Answer: B

Question: 4

Which of the following activities are typical of the reconnaissance stage of a cyber attack?
(Choose two)
Response:

A. Installing malware
B. Scanning for open ports
C. Harvesting employee emails
D. Encrypting critical files

Answer: B,C

Question: 5

In the cloud shared responsibility model, which party is responsible for physical infrastructure?
Response:

A. Customer
B. Cloud provider
C. End user
D. Government

Answer: B

Question: 6

What are two common activities that take place in the improvement phase of security operations?
(Choose two)
Response:

A. Tuning SIEM rules
B. Reviewing incident response
C. Terminating users
D. Disabling VLANs

Answer: A,B

Question: 7

Which features are typically found in Next-Generation Firewalls (NGFWs) but not in traditional stateful firewalls?
(Choose two)
Response:

A. Port-based filtering
B. Application-layer inspection
C. Integrated intrusion prevention
D. Simple packet forwarding

Answer: B,C

Question: 8

Which of the following is a characteristic of dynamic routing protocols?
Response:

A. Require manual route configuration
B. Automatically adapt to network changes
C. Only work on Layer 7
D. Are used exclusively for wireless networks

Answer: B

Question: 9

Which of the following are characteristics of a Meddler-in-the-Middle (MITM) attack?
(Choose two)
Response:

A. Uses brute force to guess passwords
B. Attacker intercepts communication between two parties
C. Often occurs on public Wi-Fi
D. Requires no access to network traffic

Answer: B,C

Question: 10

A company enforces strict role-based access control (RBAC), requiring employees to access only the systems necessary for their roles. Authentication is performed using passwords and a one-time code sent to employees' mobile devices. Which IAM practices are reflected here?

Response:

A. SSO and static routing
B. Least privilege and multi-factor authentication
C. Biometric authorization and DLP
D. IP tunneling and MAC filtering

Answer: B
