Latest Version: 6.0

Question: 1

A client plans to reliably and securely move large files and data sets from on-premises to IBM Cloud. Which option meets their requirements?

Response:

- A. FTP/SFTP
- B. SCP
- C. Cloud Object Storage using Aspera client
- D. IBM Mass Data Migration

Answer: C

Question: 2

Which two Linux software distributions are available to deploy as a stock OS image on IBM Power Virtual Server?

Response:

- A. CentOS
- B. SUSE
- C. Oracle Linux
- D. Red Hat
- E. Ubuntu

Answer: B,D

Question: 3

On IBM Power Virtual Server, what is the largest IBM i instance that can run on an S922/S1022?

Response:

- A. 2 cores
- B. 4 cores
- C. 8 cores
- D. 16 cores

Answer: B

Question: 4

Which is a benefit of running IBM i on IBM Power Virtual Server?

Response:

- A. Near-zero downtime ensures mission-critical applications remain up and running
- B. It provides best-in-class performance for databases such as Db2 and Oracle
- C. IBM Power Virtual Server allows for legacy versions of IBM i
- D. Red Hat OpenShift for IBM i enables enterprise-grade containerized workloads

Answer: A

Question: 5

A client is concerned that the new version of AIX might impact their production software. What does the IBM Power Virtual Server solution offer to help this client?

Response:

- A. Production application hosting
- B. Dedicated canary testing region
- C. An AIX and/or IBM i test and development workspace
- D. GEO-spatial mirroring

Answer: C

Question: 6

What is accurate about Power Edge Router (PER) connections in IBM Power Virtual Server?

Response:

- A. PER connection is the legacy version used for older data centers to connect IBM Power Virtual Server to the rest of IBM Cloud
- B. PER creates a Direct Link (2.0) Connect instance to connect the IBM Power Virtual Server instances to the IBM Cloud resources within an IBM Cloud account
- C. IBM Cloud Connections provides an improved user experience with reduced complexity and cost for clients over a PER connection
- D. PER connection provides an improved user experience with reduced complexity and cost for clients over IBM Cloud Connections

Answer: D

Question: 7

Which security measure does IBM use to manage infrastructure security in IBM Power Virtual Server?
Response:

- A. Managing all control plane and management components used to operate the Infrastructure-as-a-Service (IaaS) layer
- B. Implementing security within the operating system/logical partition (OS/LPAR)
- C. Integrating with IBM Cloud Security Operations (SOC) for 24x7 SIEM monitoring
- D. Providing tooling and best practices for clients and system integrators to manage workload security

Answer: A

Question: 8

What is a common use case for PowerHA Enterprise Edition in IBM Power Virtual Server?
Response:

- A. Cold standby
- B. Disaster recovery scenarios
- C. Resource optimization
- D. Virtualization management

Answer: B

Question: 9

Which two backup solutions are available in the IBM Cloud Catalog for AIX in IBM Power Systems Virtual Servers?
Response:

- A. IBM Storage Protect
- B. IBM Backup, Recovery, and Media Services (BRMS)
- C. IBM Cloud Storage Solutions (ICC)
- D. Veritas
- E. Compass by Cobalt Iron

Answer: A,E

Question: 10

When the memory utilization cannot be determined due to various reasons for an IBM Power Virtual Server, what might be reflected in the IBM Cloud Monitoring dashboard for the percentage of memory utilized?

Response:

- A. 0%
- B. 100%
- C. No value
- D. 99%

Answer: B
