Question: 1

Which exam objective is most directly tested by a question that asks a candidate to use dashboard cards, Work Orders RBA productivity features, Technician and Inspections hybrid access modes, and AI-assisted problem-code recommendations in one work-management flow?

- A. It tests the ability to use role-based applications and dashboards to manage work efficiently.
- B. It tests the ability to execute and document field work during active processing.
- C. It tests the ability to review actuals and finalize work-order completion statuses.
- D. It tests the ability to personalize locale, display, and profile preferences for users.

Answer: A

Question: 2

When planning labor for a Work Order, a planner specifies a "Craft" but does not assign a specific person. What is the benefit of this approach?

- A. It prevents the Work Order from being approved until a name is added.
- B. It allows any laborer with that specific skill set to be assigned later via Assignment Manager.
- C. It automatically routes the Work Order to the Laborer's supervisor for approval.
- D. It ensures the Work Order can only be viewed by the Department Manager.

Answer: B

Question: 3

What is the primary advantage of using a "Role Based Application" (RBA) like the Technician app over the "Classic" Work Order Tracking application?

- A. RBAs allow for more complex database configuration.
- B. RBAs provide a simplified, mobile-friendly interface tailored to specific job functions.
- C. RBAs are the only way to create a Job Plan.
- D. RBAs do not require a user license.

Answer: B

Question: 4

Which statement best describes the purpose of reviewing actual labor before completing a work order?

- A. It confirms the recorded time spent performing the work.
- B. It confirms the recorded roles used for approving the work.
- C. It confirms the recorded pods used for deploying the work.
- D. It confirms the recorded licenses used for funding the work.

Answer: A

Question: 5

A technician is reviewing a Work Order and needs to see the original "Service Request" that triggered the job. Where can they find a direct link to this record?

- A. In the "Specifications" tab.
- B. In the "Related Records" tab.
- C. In the "Failure Reporting" tab.
- D. In the "Work Log" tab.

Answer: B

Question: 6

Which action is explicitly listed by IBM as part of completing work in Maximo work execution flows?

- A. Enter meter readings for assets and locations.
- B. Enter database statistics for packages and collections.
- C. Enter authentication secrets for users and groups.
- D. Enter deployment variables for pods and routes.

Answer: A

Question: 7

Which action must be performed to make a Safety Plan available for selection on a Work Order?

- A. The Safety Plan must be in 'ACTIVE' status.
- B. The Safety Plan must be linked to the Asset or Location on the Work Order.

- C. The Safety Plan must be approved by the System Administrator.
- D. The Work Order must be in 'INPRG' status.

Answer: B

Question: 8

A Work Order was accidentally changed to 'CLOSE'. What is the standard procedure to correct this if more actuals need to be recorded?

- A. Simply change the status back to 'INPRG'.
- B. Use the "Edit History" action to delete the 'CLOSE' status.
- C. Create a new "Follow-up" Work Order or use the "Re-open Work Order" action if enabled by the administrator.
- D. Delete the Work Order and create a duplicate.

Answer: C

Question: 9

A maintenance lead needs to organize a large project where one main Work Order governs several smaller, related tasks. What feature should be used to create this relationship?

- A. Problem Codes.
- B. Work Order Hierarchy (Parent/Child relationships).
- C. Failure Reporting.
- D. Meter Roll-up.

Answer: B

Question: 10

Which statements correctly describe supported actions in the Workflow Assignments application?
(Choose two)

- A. Users can accept multiple assignments in one bulk action.
- B. Users can reassign multiple assignments in one bulk action.
- C. Users can rebind multiple packages in one bulk action.
- D. Users can recreate multiple dashboards in one bulk action.

Answer: A,B
