Latest Version: 6.0

Question: 1

You want to use a Script Template to install a package. You want the template to be smart enough to use yum on RHEL and apt on Ubuntu. Does the following code snippet within the template achieve this?

```
<% if (instance.osFamily == 'debian') { %> apt-get install -y mypkg <% } else { %> yum install -y mypkg <% } %>
```

Response:

- A. Yes
- B. No

Answer: A

Question: 2

When creating a File Template, you need to dynamically insert the IP address of the primary network interface of the instance being provisioned. Which variable should be used?

Response:

- A. <%= instance.ip %>
- B. <%= server.internalIp %>
- C. <%= container.ipAddress %>
- D. <%= network.primary.address %>

Answer: B

Question: 3

You need to ensure that when an App is deleted, the DB Tier is deleted only after the Web Tier has been successfully removed. How is this configured?

Response:

- A. Set the "Teardown Order" in the Blueprint (higher numbers delete first).
- B. Morpheus automatically reverses the "Tier Order" during deletion.
- C. Create a manual Teardown Workflow with a "Wait" task.
- D. Deletion order is not configurable; all tiers delete in parallel.

Answer: B

Question: 4

Which Morpheus component is used to define a reusable block of code that can be imported into multiple Script Templates or Tasks to maintain consistency (e.g., a standard logging function)?

Response:

- A. Cypher Mount
- B. Script Template (referenced via include)
- C. Task Set
- D. Option List

Answer: B

Question: 5

An App Blueprint has a "Post-Provision" Workflow defined at the Blueprint level, and another defined at the Instance level. In what order do they run?

Response:

- A. Instance Workflow runs first, then Blueprint Workflow.
- B. Blueprint Workflow runs first, then Instance Workflow.
- C. Only the Blueprint Workflow runs; it overrides the Instance.
- D. They run in parallel.

Answer: A

Question: 6

What is the scope of a variable defined within the "Global Variables" section of the Morpheus appliance settings?

Response:

- A. It is accessible only to the Master Tenant.
- B. It is accessible across all tenants and all workflows.
- C. It is accessible only within Operational Workflows.
- D. It is only accessible via the CLI/API, not in Script Templates.

Answer: B

Question: 7

A Workflow fails during the "Post-Provision" phase. The error log indicates: Variable 'customOptions.dbPassword' not found. What is the most likely cause?

Response:

- A. The Cypher service is offline.
- B. The Input associated with the instance was not filled out by the user.
- C. The Task is set to "Local" execution and cannot see instance variables.
- D. The variable needs to be prefixed with morpheus..

Answer: B

Question: 8

When using the Morpheus CLI, which command is used to switch between different Morpheus appliance environments (e.g., switching from Lab to Production)?

Response:

- A. morpheus use [remote]
- B. morpheus remote use [remote]
- C. morpheus context [remote]
- D. morpheus set-env [remote]

Answer: B

Question: 9

You have a multi-tier App where the App Tier needs to know if the DB Tier is "Healthy" before it starts its own service. Which Morpheus feature can provide this status check?

Response:

- A. A "Wait" task in the App Tier's Post-Provision workflow.
- B. The app.tiers.db.status variable.
- C. An "Operational Workflow" that pings the DB port.
- D. A "Health Check" policy applied to the Blueprint.

Answer: B

Question: 10

What is the primary function of a Request Script in an Option List?

Response:

- A. To format the JSON response into a visible list for the user.
- B. To modify the outgoing API request (e.g., adding headers or parameters) before Morpheus calls the Source URL.
- C. To translate the selected value into a different variable name.
- D. To validate that the external API is online before the user clicks the dropdown.

Answer: B
