Latest Version: 6.0

Question: 1

A customer asks the architect to finalize the executive summary for a campus modernization proposal. Which topics should the architect emphasize?
(Select TWO)

- A. Business outcomes and operational improvements
- B. Scalability and security benefits
- C. Printer maintenance timelines
- D. Employee cafeteria staffing plans

Answer: A,B

Question: 2

A university plans to modernize its campus access network using HPE Aruba Networking solutions. During discovery workshops, the architect learns that more than 20,000 wireless devices connect during peak periods, and IT staff struggle to maintain consistent security policies across multiple buildings. Which requirement should the architect prioritize FIRST?

- A. Centralized policy management
- B. Dedicated Layer 2 ring deployment
- C. Independent local authentication
- D. Static VLAN assignments

Answer: A

Question: 3

A customer requires resilient wireless connectivity for collaboration applications during infrastructure maintenance events and uplink failures. Which architecture characteristics should the architect include?
(Select TWO)

- A. Redundant forwarding paths
- B. Fast failover capabilities
- C. Single active uplinks
- D. Static unmanaged switching

Answer: A,B

Question: 4

A customer requests documentation showing how the proposed design maintains wireless availability during uplink failures. Which documentation component is MOST appropriate?

- A. Resiliency and failover workflows
- B. Employee travel policies
- C. Printer procurement timelines
- D. Office seating diagrams

Answer: A

Question: 5

A customer requires campus-wide wireless coverage for high-density collaboration areas while maintaining consistent security policies across multiple buildings. Which requirements should the architect prioritize during discovery?
(Select TWO)

- A. Centralized policy enforcement
- B. Consistent wireless authentication services
- C. Independent local authentication
- D. Static VLAN-only deployment

Answer: A,B

Question: 6

A customer asks for documentation supporting long-term operational management after deployment completion. Which information should the architect include?
(Select TWO)

- A. Monitoring and troubleshooting guidance
- B. Operational workflow procedures
- C. Office renovation planning
- D. Printer replacement contracts

Answer: A,B

Question: 7

A customer questions why Aruba Central is included in the proposed campus architecture. Which operational benefits should the architect emphasize?
(Select TWO)

- A. Centralized visibility and monitoring
- B. Automated management workflows
- C. Elimination of authentication services
- D. Removal of uplink redundancy requirements

Answer: A,B

Question: 8

A customer reports operational delays caused by inconsistent switch configurations and manually applied security policies across multiple campus sites. Which design capability BEST addresses this challenge?

- A. Centralized orchestration and automation
- B. Independent local administration
- C. Static VLAN-only deployment
- D. Dedicated Layer 2 ring topology

Answer: A,B

Question: 9

A customer wants to reduce troubleshooting delays caused by inconsistent wireless policy enforcement between sites. Which requirement should the architect define FIRST?

- A. Centralized policy governance
- B. Dedicated Layer 2 ring deployment
- C. Independent switch management
- D. Static VLAN assignments

Answer: A

Question: 10

A customer requires future scalability for increased wireless device density and IoT expansion across multiple campuses. Which design capabilities should the architect prioritize?
(Select TWO)

- A. Modular campus scalability
- B. Centralized operational management
- C. Single-controller dependency
- D. Static local-only administration

Answer: A,B
