2. **Questions and Answers in PDF Format.**

Latest Version: 6.0

Question: 1

Huawei's campus network solution supports AI traffic prediction for energy saving. In this solution, IoT APs are recommended to adopt non energy saving by default.

A. TRUE
B. FALSE

Answer: A

Question: 2

Which of the following deployment modes are supported by Huawei's enterprise APs? (Choose all that apply.)

A. CloudCampus APP (barcode scanning)-based deployment
B. Email-based deployment
C. DHCP Option 148-based deployment
D. Registration query center-based deployment

Answer: A,C,D

Question: 3

A virtual network is also called an overlay network. Huawei's SD-WAN Solution uses the IP overlay virtualization technology to build one or more virtual networks on top of the physical network. Service policies are deployed on virtual networks and are decoupled from the physical network, thereby separating services from WAN interconnections.

A. TRUE
B. FALSE

Answer: A

Question: 4

In Huawei's cloud-managed campus network solution, APs are automatically and randomly grouped to ensure optimal radio calibration results.

A. TRUE
B. FALSE

Answer: B

Question: 5

Huawei IoT APs can provide IoT services through built-in IoT modules or external IoT cards, avoiding repeated IoT network construction and reducing CAPEX.

A. TRUE
B. FALSE

Answer: A

Question: 6

Huawei iMaster NCE-CampusInsight offers professional network evaluation report services. Specifically, it automatically generates network quality evaluation reports (which cover the network overview, metric details, and rectification suggestions) in real time or periodically, making network experience measurable.

A. TRUE
B. FALSE

Answer: A

Question: 7

Global radio calibration adopts a "the more, the better" approach. It needs to be performed immediately if poor wireless experience is detected.

A. TRUE
B. FALSE

Answer: B

Question: 8

Which of the following wireless security standards is proposed by China?

A. AES
B. WPA
C. WPA2
D. WAPI

Answer: D

Question: 9

On a small or midsize campus network, an egress gateway can function as the DHCP server to assign IP addresses to terminals.

A. TRUE
B. FALSE

Answer: A

Question: 10

Which EDR capabilities can be used to detect ransomware based on behaviors? (Choose all that apply.)

A. CDE
B. Deception engine
C. Graph engine
D. HIPS engine

Answer: B,C,D
